 HTTP request (Hyper Text Transfer Protocol)
 Server

Servers : →
 (i) Application Server
 IBM Websphere
 (ii) Web Server
 Jetty
 Tomcat (10.0)
 db

Types of HTTP Requests: →
 { GET, POST, PUT, PATCH, DELETE }

JSP → Java Server Pages
 JSF → Java Server Faces
 (Static data)
 * (HTML)

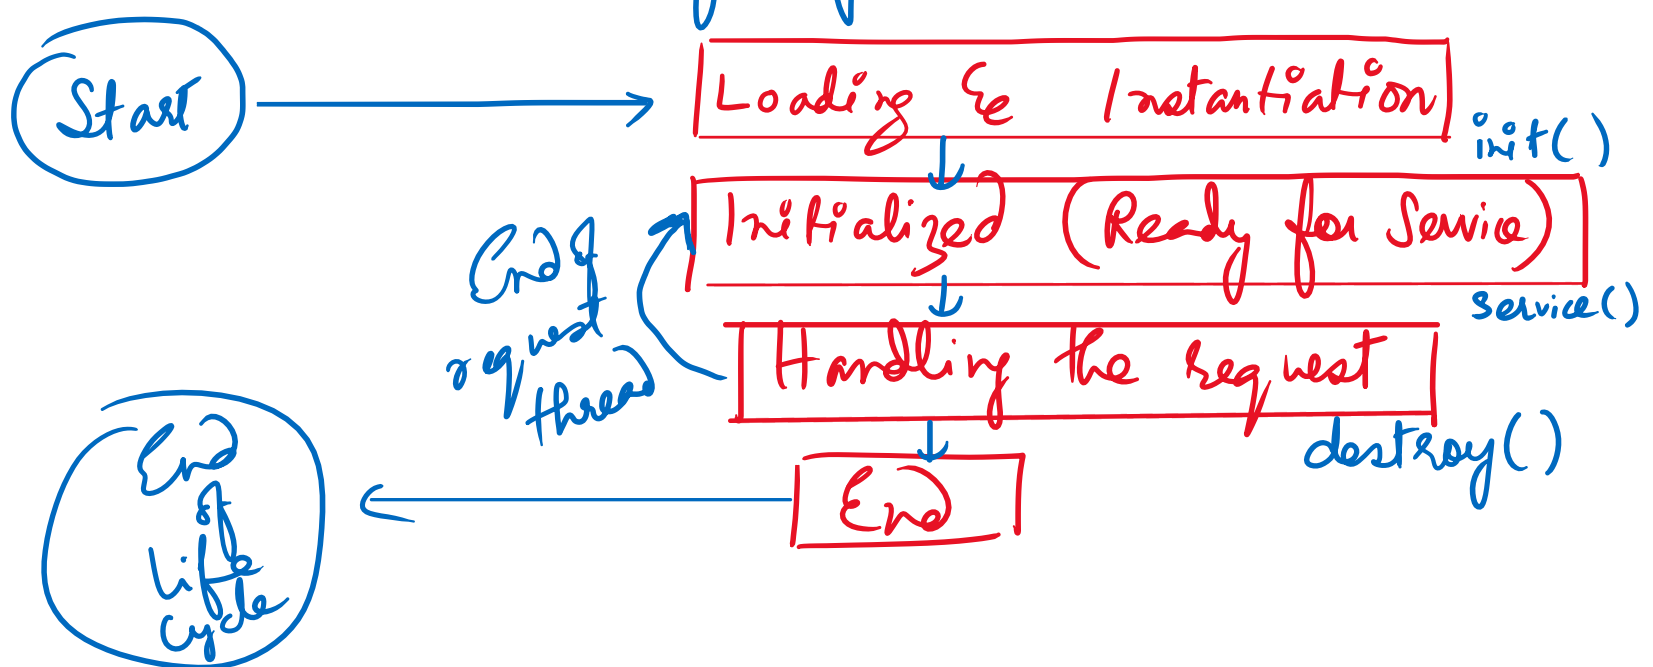

Servlet

Normal HTML files (static files) (don't change) & therefore can be rendered (displayed) directly.

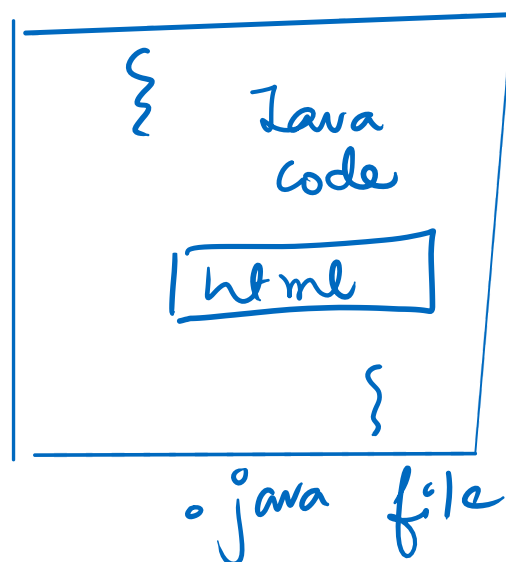

But, any data from the database has to be fetched for that we need (SSP) like Servlet, JSP, JSF, Struts.

Servlet Life Cycle

In servlets we write: ☑

JSP
 { Java inside HTML }

Servlet
 { HTML inside Java }
